## DETAILED ACTION

### *Response to Amendment/Arguments*

1. Applicant's amendment and arguments filed on 04/27/2006 have been fully considered and they are found unpersuasive.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1, 4 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification has support for a processing aid polymer particle, not a powder particle (too broad of a description). Furthermore, there is not support for

Art Unit: 1713

a plural powder particle. The support is for a first and second processing aid polymer particles.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 4 and 9 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The Applicants recite a plural polymer particle. The following reciting of plural polymer particle have no antecedent basis.

6. The Examiner will maintain the prior 102 (e) rejection.  
Once the 112 issues are resolves, the Examiner will take  
reconsider the rejection.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1713

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

8. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

9. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamilton et al., U.S. Patent No. 6,730,734 (hereinafter "Hamilton"). Hamilton teaches impact modifiers, mineral oil and plastics resins. See Hamilton, col. 2, line 42 through col. 6, line 25. The impact modifiers disclosed in Hamilton are rubbery polymers incorporated in the claimed ranges and the plastic resins are high Mw polymers. See cols. 10-11. Hamilton teaches the use of processing aids such as PARALOID K-120N (a trademark of Rohm and Haas), which is a high molecular wt. MMA copolymer.
